

# KINETICO SYSTEM CARE 1,2,3

*Your new system will take up to 2 weeks to clean your water. If you notice any issues, please call us. It is important to keep your salt and calcite levels up. You can add salt yourself, call us to schedule calcite refills or for filter changes.*

## SYSTEM RECOMMENDATIONS

- ✓ Add salt in brine tank when you see a water at bottom of brine tank
- ✓ Filters need to be changed yearly unless recommended sooner
- ✓ Check salt levels monthly
- ✓ Check calcite levels in 6 months with a flash light on outside of tank
- ✓ Low pressure could indicate it is time for a filter change
- ✓ Note: Your system will backwash regularly and water will drain

## WHAT TO DO

### Do's

- Use chunky pelleted salt
- Flush water through house if you get a blast of salty water due to power outages
- Use less shampoo, soap and detergents

### Don'ts

- Use granular salt
- Let your system run out of salt
- Don't wash and re-use filters unless using pleated filters
- Do not overfill brine tank with add only salt 2-3 bags at a time
- Only use Calcite if you have a neutralizer - do not put in brine tank
